Summary

I specialise in building and deploying scalable, high-performance web applications with expertise in various languages, frameworks and libraries. Proficient in designing and implementing advanced features such as custom authentication workflows, dynamic form handling, and real-time data interactions. Skilled in optimizing backend systems with caching strategies, serverless architecture, and API integrations, ensuring reliability and scalability for complex applications. Good at crafting dynamic, interactive frontends and reusable components, leveraging JavaScript libraries such as React. With proven track record of delivering robust software solutions that solves complex problems, creating innovative solutions, and streamlining workflows, all while staying at the forefront of emerging technologies.

Experience

Freelance, Lagos — *Software and Automation Engineer*

Provided end-to-end software and automation solutions to clients, leveraging technologies such as Python, JavaScript, and Django. Streamlined business workflows, automated manual processes, and built user-friendly applications across web and mobile platforms.

Alx Africa, Online — *Software and Automation Engineer*

Built a Betty Linter wrapper compatible with Android. Created "Custom Commands," a modular Python CLI tool, and developed "Article Hive," a robust publishing platform featuring role-based access control, content management, and a user-friendly interface.

Altaviz Support Limited, Lagos — *Software Engineer*

- Activation of NCR(S1) and GRG ATMs
- Resolution of fault calls on Wincor, NCR and GRG ATMs
- Testing the working condition of various electronic boards such as: CMD boards, interface cards, electronic boxes, NCR interface cards and GRG main-boards
- Providing remote supports for custodians and fellow team members
- Cassettes configuration
- Designed and implemented a workflow management system that streamlined internal communications, automated support processes, and improved task tracking across departments. Significantly enhanced operational efficiency and team collaboration.

Skills

- Python, JavaScript(ES6), C, HTML5 and CSS
- Web Application, Server development
- Proficient with Linux and Windows CLIs
- UI/UX
- React.js, Django (Web Framework), and REST framework (DRF)
- Automation Scripting (Python, bash, batch, PowerShell)
- Git and GitHub

Awards

- **Software Engineering (ALX)**
- **Meta Front-End Developer (Specialization):** Coursera (Meta)
- **Meta Back-End Developer (Specialization):** Coursera (Meta)
- **IT Automation with Python (Specialization):** Coursera (Google)
- **Google IT Support (Specialization):** Coursera (Google)

Education

Federal University of Technology Akure, Ondo — *B.Eng*
